

Brainstorm & idea prioritization

[illegible]

Non-attending
Students are required to attend all of the meetings and attend on time. Absence may result in withdrawal from the course.

Writing skills
Students are required to submit a written assignment at the end of the course.

Grading system
Students are required to attend all of the meetings and attend on time. Absence may result in withdrawal from the course.

Figure 1 illustrates the experimental design through eight steps. Each step shows a group of cells, with one cell highlighted in yellow to represent the target. The steps are as follows:

- Step 1:** A group of 4 cells, with 1 target cell (yellow) and 3 non-target cells (grey).
- Step 2:** A group of 3 cells, with 1 target cell (yellow) and 2 non-target cells (grey).
- Step 3:** A group of 2 cells, with 1 target cell (yellow) and 1 non-target cell (grey).
- Step 4:** A group of 1 cell, which is the target cell (yellow).
- Step 5:** A group of 4 cells, with 1 target cell (yellow) and 3 non-target cells (grey).
- Step 6:** A group of 3 cells, with 1 target cell (yellow) and 2 non-target cells (grey).
- Step 7:** A group of 2 cells, with 1 target cell (yellow) and 1 non-target cell (grey).
- Step 8:** A group of 1 cell, which is the target cell (yellow).

The graph shows two convex indifference curves on a coordinate system where the vertical axis is labeled 'consumption' and the horizontal axis is labeled 'leisure'. The origin is marked with '0'. A horizontal dashed line intersects the lower curve at a point labeled 'leisure' on the x-axis and 'consumption' on the y-axis. A vertical dashed line intersects the upper curve at a point labeled 'leisure' on the x-axis and 'consumption' on the y-axis. A yellow box in the top right corner contains the text: 'The indifference curve is convex to the origin, which means that the marginal utility of consumption is decreasing.' Another yellow box in the middle right contains the text: 'The indifference curve is convex to the origin, which means that the marginal utility of consumption is decreasing.' A third yellow box in the bottom left contains the text: 'The indifference curve is convex to the origin, which means that the marginal utility of consumption is decreasing.'

- Open the book**
Open your book to the first page containing the problem. Read the problem carefully.
- Understand the problem**
Read the problem carefully. What is the question? What information is given? What is the goal?
